# Construction Series Products

| 3030BK | 3030BK is the highest rated tape for building wrap on the market. 3030BK is commercial rated and can stick to difficult surfaces where other tapes can’t. Also exceptional adhesion to foam insulation and gypsum sheathing. |
| 3030WH | 3030WH has the same properties as 3030BK in a white tape. This tape also has many other possible applications where extreme performance is required. |
| 9030BK | 9030BK is a 2-sided version of 3030BK and can be used on building wrap seams to eliminate any tape being exposed. This tape is also used by hardwood flooring installers to perfectly align starting pieces prior to fastening. Available in 1” and 2” width rolls x 65’ lengths |
| 2020SB | 2020SB (Sky Blue) is a superior house wrap seam tape. 2020SB offers extreme adhesion, durability and user friendly features at a price comparable to standard house wrap tapes. Available in 2” and 3” width rolls X 164’ lengths. |

## 3040BK Flashing Series

Ultimate Flashing performance with unmatched contractor friendly features. AAMA 7-11 Level 3 Class A means 3040BK Flashings meet the highest standards for hot and cold performance and does so without the need for additional primer. Lighter weight than butyl or rubberized asphalt flashings, 3040BK significantly outperforms these products.

| 3040BK | -3040BK 2” has quickly become a favorite of deck builders across the U.S. No other product combines performance and ease of use. Adds protection to deck joists and helps to increase longevity.  
-3040BK 4” is used by deck builders as well but also moves into the window and fenestration application. High performance, repositionable, and able to be installed without the use of razor knives or scissors make G-Tape Flashing unlike any other product you’ve seen.  
-3040BK is used to professionally flash Windows, doors, deck beams, etc. Use anywhere you need permanent protection.  
-3040BK Flashings have been shown to adhere to the toughest surfaces and in the toughest environments.  
-3040BK Flashings have been recently tested for 50 year ageing and have demonstrated to retain over 60% of original adhesion and over 100% of original tensile strength. We challenge all other Flashing products to do the same. |
| 3040 Log Roll 51” x 65’ | -3030BK Log rolls available for unique applications. |
